DETAILED ACTION

1. As a preliminary matter, applicant's preliminary amendments dated August 1, 2006 includes a new listing of species with last claim 27 being incomplete. Since the claim status indicate "original" for claim 27, claim 27 has been interpreted as being the same as the original claim 27 for the Election/Restriction requirement in the current Office Action. Applicant is suggested to submit a complete listing of claims with appropriate corrections.

2. Claim 1-27 are pending.

Election/Restrictions

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

List I: Binding Substance for Synthetic Polymer

1. Morphine
2. Propofol
3. Antibiotic
4. IMA

List II: Interior Space Material

1. Conducting material
2. Mediator

List III: Transducer

1. Electrochemical

Art Unit: 1641

2. Conductimetric
3. Optical
 - a. Fluorescent
 - b. Luminescent
 - c. Absorption
4. Time-of-flight
5. Gravimetric
6. Strain
7. Displacement
8. Surface acoustic wave
9. Resonant
10. Thermal
11. Combination thereof (for this selection, applicant is further required to indicate a specific combination of transducers)

Applicant is required, in reply to this action, to elect a single species and subspecies, if present, from each of the three lists of species, to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

List I: Binding Substance for Synthetic Polymer (claim 13)

1. Morphine (claim 13)
2. Propofol (claim 13)
3. Antibiotic (claim 13)

Art Unit: 1641

4. IMA (claim 13)

List II: Interior Space Material (claim 16)

1. Conducting material (claim 16)
2. Mediator (claim 16)

List III: Transducer (claim 21)

1. Electrochemical (claim 21)
2. Conductimetric (claim 21)
3. Optical (claim 21)
 - a. Fluorescent (claim 21)
 - b. Luminescent (claim 21)
 - c. Absorption (claim 21)
4. Time-of-flight (claim 21)
5. Gravimetric (claim 21)
6. Strain (claim 21)
7. Displacement (claim 21)
8. Surface acoustic wave (claim 21)
9. Resonant (claim 21)
10. Thermal (claim 21)
11. Combination thereof (for this selection, applicant is further required to indicate a specific combination of transducers, claim 21)

The following claim(s) are generic: 1-12, 14, 15, 17-20, and 22-27.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each of the species set forth above has different special technical features.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Art Unit: 1641

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to UNSU JUNG whose telephone number is (571)272-8506. The examiner can normally be reached on M-F: 9-5.
